

Windstorm Certification Process

HB 1900 and SB 615 (2019)

Definitions

New Structures: All structure types, including residential, commercial, Public Works facilities, farm and ranch, industrial, institutional, educational, mercantile, factory, assembly, or other structure types.

Additions: All types and sizes.

Repairs: All work not included in the "No Inspections Required" rule, is required to be certified. Please see: <https://tdi.texas.gov/wind/no-inspection-required.html>.

Alterations: Changing a structure from the original design, or replacement of components and cladding, including exterior windows, exterior doors, garage doors, exterior wall coverings, roof coverings, roof components, mechanical equipment and other types of components or cladding.

TDI Windstorm Inspectors only inspect non-engineered type structures. If you have questions, please call the TDI Windstorm Inspections Program or TDI Engineering at (800)248-6032.
